FB6300 Series
Flush Bolt

maximise without compromise

FB6300 Flush Bolt

Flush door bolts are rebated into a door, and are normally operated by a small lever which sits perfectly flush both when the bolt is engaged and the doors closed. For maximum security Axim flush bolts have a hardened steel bolt, zinc plated with an anti-rattle sleeve and secure the slave leaf of a pair of doors. A standard installation requires two flushbolts morticed into the top and bottom of the door.

Axim's FB-63 extension flush bolts are a range of lever action flush bolts, primarily intended for mounting in the leading edge or inside face of the slave leaf of a pair of doors.

Features:

- The Axim FB6300 door bolts are guaranteed for 30 months
- Smooth lever action
- Available in 2 lengths, 305mm & 152mm to suit differing door heights
- Silver satin chrome, bronze powder coat or a mill finishes
- Shoot bolt: 18 mm diameter and a die cast zinc alloy body mechanism
- Floor socket keep is sprung loaded and dust resistant with a satin chrome finish
